Reg. No. 33,280

12. A method according to claim 1, wherein the second temporary layer of step (a) is made of a polymer or made of glass.

13. A method according to claim 12, wherein the polymer is polyimide.

5

14. A method according to claim 4, wherein the fifth planarization layer of step (i) is made of a polymer or made of glass.

15. A method according to claim 14, wherein the polymer is polyimide.

10

16. A method according to claim 4, wherein the sixth layer of step (ii) is made of a material selected from the group including  $\text{SiO}_2$ ,  $\text{Si}_3\text{N}_4$ , Ti, Al, V, Au and Si.

15 17. A method according to claim 4, wherein the depositing of step (ii) is performed by means of a technique selected from the group including sputtering technique, resistive evaporation technique and electroplating technique.

20 18. A method according to claim 4, wherein the etching of step (iii) is performed by means of a reactive ion etching technique or a wet etching technique.

25 19. A suspended microstructure with a sloped support produced by the method of ~~anyone of the claims 1 to 18~~ -- claim 1 --
